### **Understanding Guitar Chords on the Dulcimer**

Adapting guitar chords to the mountain dulcimer requires a nuanced understanding of both instruments' tuning and fretboard layout. The dulcimer's three strings, tuned DAD, differ significantly from the six strings of a guitar, necessitating creative transposition techniques.

### **Transposing Guitar Chords**

To transpose a guitar chord to the dulcimer, identify its root note and the intervals between the other notes. For instance, a C major chord on a guitar (032010) has a root note of C and consists of a major third (E) and a

perfect fifth (G). On the dulcimer, the corresponding notes would be found on the 0th fret of the middle string (D), the 2nd fret of the middle string (F#), and the 0th fret of the bass string (A).
