

The Exotic Shorthair Cat: An Endearing and Exotic Companion for Life

The Exotic Shorthair cat is a captivating feline breed that combines the endearing traits of the Persian cat with the low-maintenance qualities of the American Shorthair. These distinctive cats are renowned for their plush, hypoallergenic coats, captivating eyes, and gentle, affectionate nature.

Origins and History

The Exotic Shorthair originated in the United States in the 1950s as a result of a breeding experiment that sought to create a cat with the distinctive appearance of the Persian but with the low-shedding, easy-care coat of the American Shorthair. The result was an adorable and unique breed that inherited the best qualities of both its parents.

Physical Characteristics

Exotics are medium-sized cats with a muscular and well-proportioned body. Their most striking feature is their luxurious coat, which is short, dense, and plush to the touch. The coat comes in a wide variety of colors and patterns, including solid, tabby, blue, cream, and smoke. Their eyes are large, almond-shaped, and typically amber or green.

Personality and Temperament

Exotics are known for their gentle, affectionate, and playful nature. They are loyal and devoted companions who enjoy spending time with their humans. Their playful side makes them entertaining and engaging pets, but they are also content to curl up on your lap or next to you on the couch.

Exotics are generally very good with children and other pets. Their easygoing nature makes them a great choice for families or households

with multiple animals.

Health and Care

Exotics are generally healthy and robust cats, with an average lifespan of 12-15 years. However, like all breeds, they are prone to certain health conditions, such as:

- Polycystic kidney disease (PKD)
- Hypertrophic cardiomyopathy (HCM)
- Dental problems

Regular veterinary checkups, vaccinations, and proper dental care are essential to maintaining an Exotic's health and well-being.

Grooming and Maintenance

While the Exotic's coat is short, it does require regular brushing to remove loose hair and prevent matting. Weekly brushing is usually sufficient, but more frequent brushing may be necessary during shedding seasons.

Exotics need to be bathed occasionally to keep their coats clean and healthy. Their nails should be trimmed regularly, and their ears should be checked for any signs of infection.

Diet and Nutrition

Exotics have moderate energy levels and require a balanced diet to maintain a healthy weight. They should be fed a high-quality cat food that is rich in protein and low in carbohydrates. Canned food, dry food, or a

combination of both can be fed, but avoid giving your cat table scraps or foods that are high in fat or sugar.

The Exotic Shorthair cat is a delightful and affectionate companion that is perfect for families, singles, and seniors alike. Their gentle nature, low-maintenance coat, and playful personality make them a joy to have around. If you are looking for a loyal and loving feline friend, an Exotic Shorthair may be the perfect choice for you.
