## Getting Started

The first step in using the Masters 31 is to get familiar with the basic controls. The front panel is divided into three sections: the oscillator

section, the filter section, and the amplifier section. Each section has its own set of controls that allow you to shape the sound of the synthesizer.

The oscillator section contains three oscillators that can generate a variety of waveforms, including sawtooth, square, and triangle waves. You can also use the oscillators to create more complex sounds, such as chords and arpeggios. The filter section allows you to shape the sound of the oscillators by removing or boosting certain frequencies. The amplifier section controls the overall volume of the synthesizer.

## **Creating Sounds**

Once you are familiar with the basic controls, you can start creating your own sounds. The Masters 31 offers a wide range of possibilities, so experiment with different settings to find the sounds you like. Here are a few tips to get you started:

- Start with a simple sound, such as a sawtooth wave.
- Use the filter to shape the sound. Try different cutoff frequencies and resonance settings.
- Add modulation to the sound using the LFOs and envelopes.
- Experiment with the different effects, such as reverb and delay.

## **Advanced Programming**

The Masters 31 also offers a number of advanced programming features that allow you to create even more complex sounds. These features include:

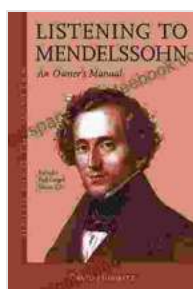

- Polyphony: The Masters 31 can play up to 32 notes at once.

- **Multitimbrality:** The Masters 31 can play up to 16 different sounds at once.
- **MIDI:** The Masters 31 can be controlled via MIDI, which allows you to use a sequencer or other MIDI controller to create and play music.
- **CV/Gate:** The Masters 31 can also be controlled via CV/Gate, which allows you to use other analog synthesizers to control it.

The Masters 31 is a powerful and versatile synthesizer that can create a wide range of sounds. The owner's manual is a comprehensive guide to the synthesizer's features and functions. With the help of the manual, you can quickly learn how to create your own unique sounds and explore the full potential of the Masters 31.
