

Where Do Hurricanes, Typhoons, and Cyclones Come From?

A 2nd Grade Science Edition

Have you ever wondered where hurricanes, typhoons, and cyclones come from? These are all names for the same type of storm, which is a large, rotating storm that forms over warm ocean waters.

Hurricanes, typhoons, and cyclones are all caused by the same thing: warm, moist air rising from the ocean. As the air rises, it cools and condenses, releasing energy that powers the storm. The storm's winds can reach speeds of up to 150 miles per hour, and it can cause heavy rain, flooding, and damage to property.

Hurricanes, typhoons, and cyclones are most common in the tropics, which is the region around the equator. The tropics are warm and moist, which provides the perfect conditions for these storms to form.

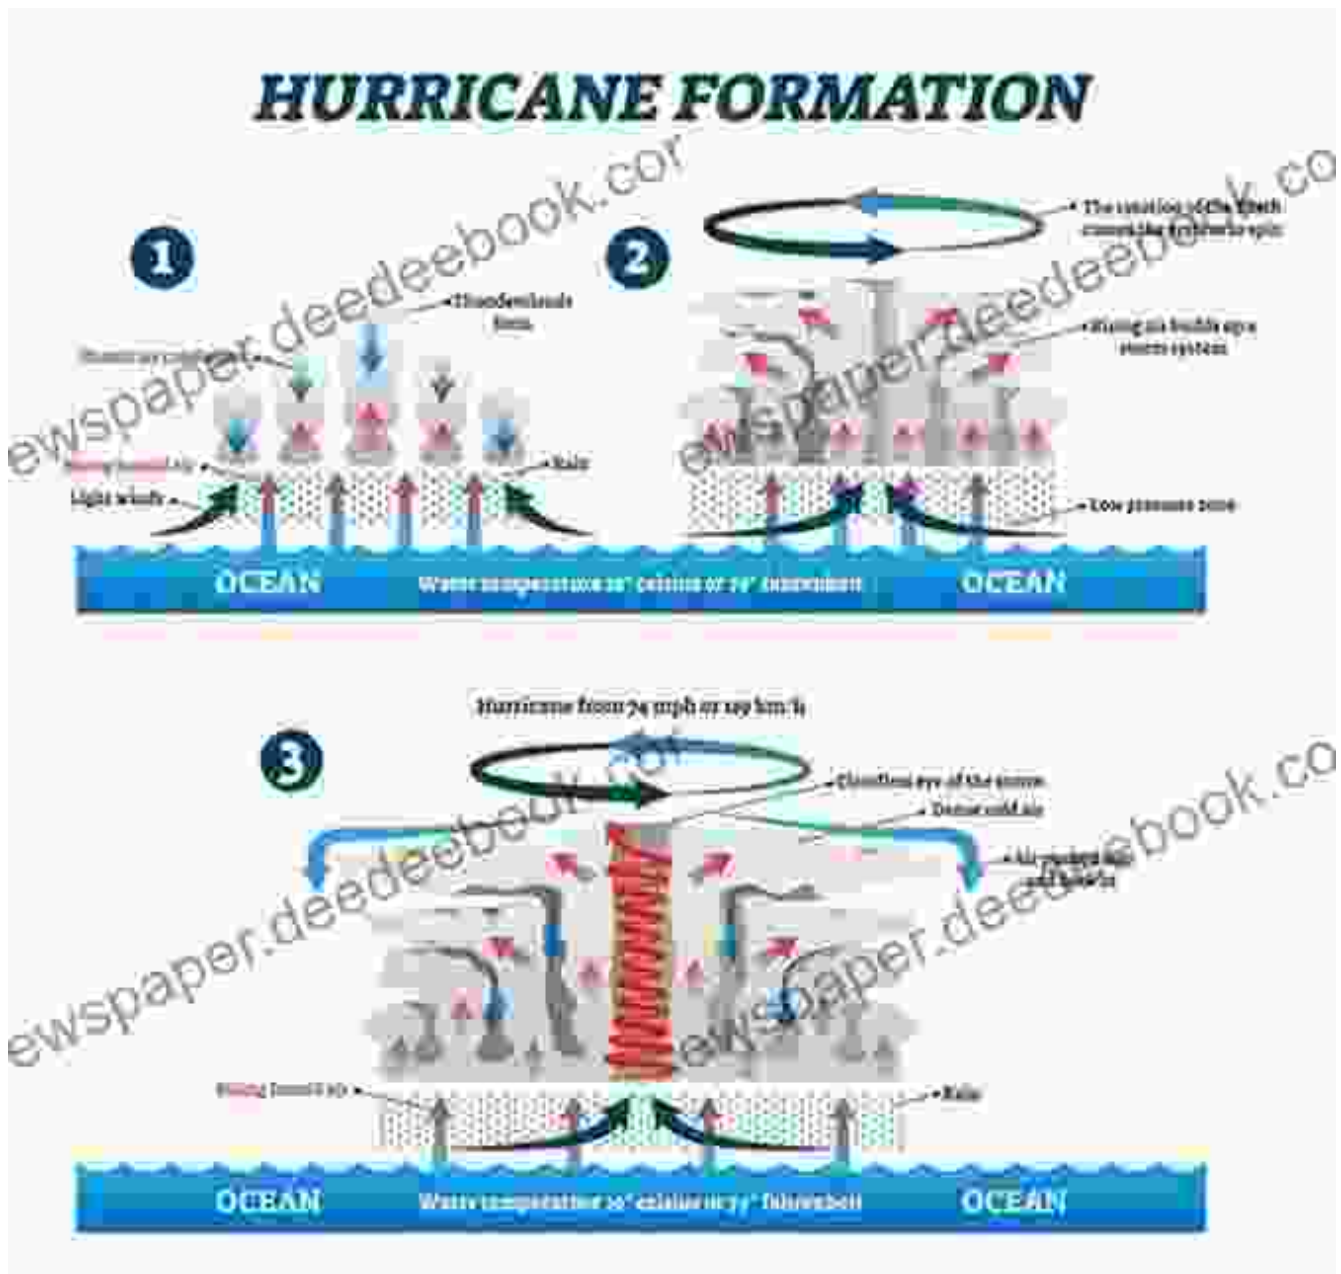

Hurricanes, typhoons, and cyclones can be very dangerous, but there are things you can do to stay safe. If you live in an area that is prone to these storms, it is important to have a plan in place for what you will do if a storm threatens. You should also listen to the advice of local officials and evacuate if necessary.

Here are some pictures of hurricanes, typhoons, and cyclones:

Here is a diagram of how a hurricane forms:

Glossary of terms:

- **Condensation:** When water vapor turns into liquid water.
- **Equator:** The imaginary line that divides the Earth into the Northern and Southern Hemispheres.

- **Hurricane:** A large, rotating storm that forms over warm ocean waters in the Atlantic Ocean and eastern Pacific Ocean.
- **Cyclone:** A large, rotating storm that forms over warm ocean waters in the Indian Ocean and western Pacific Ocean.
- **Typhoon:** A large, rotating storm that forms over warm ocean waters in the western Pacific Ocean.
- **Tropics:** The region around the equator that is warm and moist.

I hope this article has helped you to learn more about where hurricanes, typhoons, and cyclones come from. These storms can be very dangerous, but there are things you can do to stay safe. If you live in an area that is prone to these storms, it is important to have a plan in place for what you will do if a storm threatens.
